System integration for business success across Southeast Asia.

Prepared for customers and business partners
Last reviewed: August 2026

Company Overview

Company	KYOCERA Communication Systems Singapore Pte. Ltd. (KCSG)
Established	1 April 2013
Address	1 Pasir Panjang Road, #30-01 Labrador Tower, Singapore 118479
Business	System integration, application development, IT operations, automation, data integration and software-related services
Contact	contact@kcsq.com.sg

Our Role

KCSG works as a local execution partner that understands business operations, clarifies requirements, coordinates delivery and continues supporting systems after implementation.

Services

Custom System Development

Web, mobile and business applications designed around customer operations.

Managed IT Services

Application maintenance, operational coordination, monitoring and continuous improvement.

System Integration and EDI

APIs, databases, ERP, EDI and controlled file interfaces.

Automation and Data Integration

Workflow, RPA, ETL, scheduled processing and reporting support.

Legacy Modernisation

Business-rule discovery, staged replacement, data migration and coexistence planning.

Software and Licensing

Selected licence sourcing, renewal and implementation coordination.

Industries We Support

Manufacturing	ERP support, workflow, e-filing and profit-and-loss management.
Logistics	Warehouse management, transportation tracking and EDI integration.
Shipping and Maritime	Vessel budgeting and operational systems tailored to maritime processes.
Corporate Operations	Approvals, document management, reporting and back-office digitalisation.

Our industry knowledge helps us translate operational needs into practical system scope, delivery controls and long-term support.

Selected Project Experience

Logistics DX

Warehouse and delivery visibility using web, mobile and location data.

Back-office DX

Approval, electronic filing and profit-and-loss reporting.

E-commerce

PC ordering, supplier inventory and consolidated reporting.

Vessel Budget

Structured annual budgeting and prior-year template reuse.

RPA

Automation of stable repetitive operational tasks.

ETL and Data Warehouse

Consolidated source data for reporting and analysis.

How We Work

1. Understand

Business flow, issues, users and constraints.

2. Define

Scope, priorities, responsibilities and acceptance criteria.

3. Design and Deliver

Solution, data, interfaces, testing and controlled rollout.

4. Operate and Improve

Maintenance, support, change and continuous improvement.
